EXPERIENCE

Paiteq Private Limited | Bengaluru
Role – Full stack Developer
Duration – 2.10 years (Feb 2022)

- **Advanced CRUD Operations Optimization:** Explore and implement advanced techniques to optimize CRUD operations within the CRM CMS, leveraging frameworks like Angular and React to streamline data management workflows and improve efficiency.
- **Expertise in VS Code Productivity:** Deepen expertise in utilizing VS Code editor features, extensions, and shortcuts to boost productivity, streamline development workflows, and efficiently manage codebase in CRM CMS projects.
- **Version Control with Git:** Strengthen proficiency in version control using Git within VS Code, mastering branching strategies, pull requests, and collaboration workflows to effectively manage codebase changes and facilitate seamless teamwork.
- **Continuous Learning and Skill Expansion:** Commit to continuous learning and skill expansion by exploring new technologies, attending workshops, participating in online courses, and engaging in hands-on projects to stay at the forefront of CRM CMS development trends and maintain career growth.
- **UI/UX Design Development Principles Mastery:** Continuously refine UI/UX design development skills by studying industry trends, best practices, and user feedback, applying principles of usability, accessibility, and aesthetics to create intuitive and engaging interfaces and components in CRM CMS projects.
- **Promote Collaborative Team Dynamics:** Foster a culture of effective communication and teamwork, encouraging idea sharing and collective problem-solving to drive project success in CRM CMS implementation.

PROJECT EXPERIENCE

Content Management System

Weknock App

The project is a robust restaurant application designed to operate across multiple locations and vendors. It serves as a comprehensive platform for managing food orders efficiently, catering to diverse customer needs and vendor operations within the restaurant ecosystem.

Superbrains

The dashboard designed to efficiently manage users, goals, toolkits, doctors, and organizations and many more within the project ecosystem. It streamlines administration, fosters goal achievement, and supports collaboration for optimal project management.

CanPay

CanPay is a convenient platform for purchasing water cans and related products with ease. Vendors can log in to manage their listings, adding products to sell directly to consumers. Dashboard use to manage all contents and track the activity of vendors and orders.

Web App

Superbrains Coach

The project is an innovative eHealth platform aimed at personalizing the user experience to empower individuals in mastering their brain health with a team of dedicated coaches and doctors. Through a blend of coaching and medical expertise, the platform assists users in setting and achieving their mental wellness goals.

DesiPass

DesiPass is a user-friendly platform for booking movie and event tickets. It allows users to easily browse shows, check timings, and secure their seats in just a few clicks.

PERSONAL PROJECT

CareerSpark – A Job Portal

CareerSpark, developed with React.js and Socket.io, delivers an engaging platform with real-time communication features. It supports three user roles—Admin, Jobseeker, and Recruiter—each equipped with tailored functionalities. Recruiters can post jobs, manage listings, and chat with candidates, while jobseekers can search for opportunities, apply for roles, and connect directly with recruiters. Admins oversee the platform, approving or rejecting recruiter accounts and managing all data and activities to ensure a smooth user experience.
